-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what is the “plate”, as set forth in claim 9.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Smith.

Claims 1,2-6,11 and 3-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Moore. Moore shows a platform 48 detachably connected by means 58.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meyer in view of Smith. Meyer shows the claimed combination with the exception of the claimed ascension/descension apparatus. Smith at 10,30,40,50 shows the claimed ascension/descension apparatus. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Meyer to comprise an ascension/descension apparatus, as taught by Smith, in lieu of his, for accessing his pole. Furthermore, to use the device on conventional utility poles would have been obvious to one of ordinary skill in the art at the time the invention was made by the substitution of known equivalent conventional element for another.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yasui in view of Smith. Yasui shows the claimed combination with the exception of the claimed ascension/descension apparatus. Smith at 10,30,40,50 shows the claimed ascension/descension apparatus. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Meyer to comprise an ascension/descension apparatus, as taught by Smith, in lieu of his transport means at 6, for accessing his pole.
